

SynchroMate

Precision electronic carburettor synchronizer & tachometer for multi-carb motors.

Accurate : Synchronize to within less than 0,5cm Hg true resolution. No friction or inertia !

Compact : SynchroMate is just 22 x 11 cm, 0,5 kg / 1lb.

Calibrated : at the factory, thereafter automatically self-adjusts to barometric pressure change.

Upgradeable : Optional adapter kit can be assembled to allow synchronising of 4-carburettor engines.

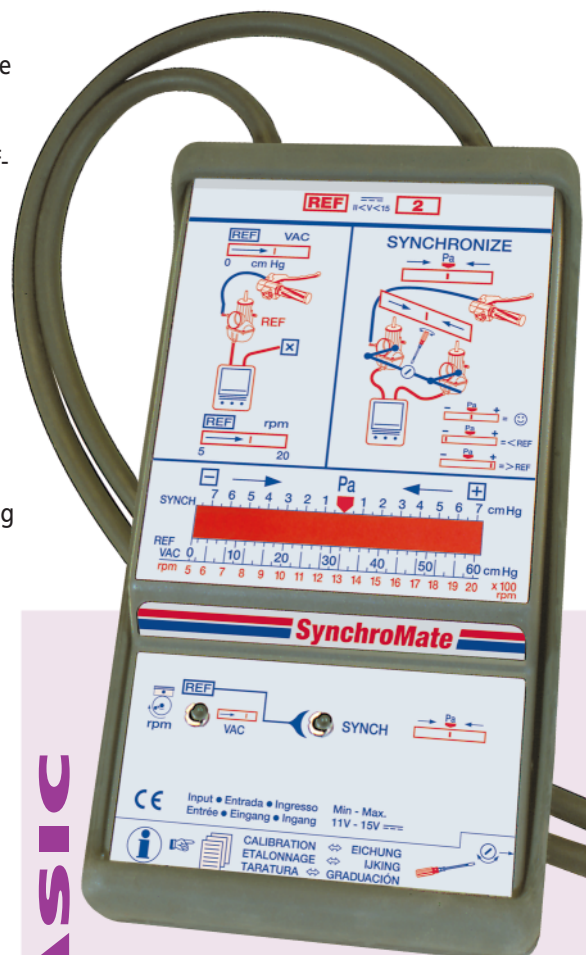

Rugged : No glass, no mercury, no sensitive dial gauges, no moving parts.

Affordable : Costs no more than quality dial gauges.

Trouble-free : Reliable «solid state» electronics. Virtually no maintenance required.

Easy : Just adjust each carb against the reference carb until the LED flashes at the Pa mark.

Complete : Built-in tachometer, 500-2000 rpm for setting engine speed.

SynchroMate

OPTIONS

Adapter kit for use on 4-cylinder engines with 4 carbs
Order reference : «SM2-4CHAD»

Alternative threaded connection adapters «flexi-rigid» type with flexible tube within rigid but nonetheless flexible guide tubes :
Order ref. «M5ADPFR» for M5 female threaded connection points.
Order ref. «M6ADPFR» for M6 female threaded connection points.

Suspension strap (A tough webbing strap with two end loops for easy suspension from workshop stands) : Order reference : «IMSTRAP».

BASIC

Order reference «SM2KIT», includes battery cord-set, rubber holder, 4 metal connection adapters (2 x M5, 2 x M6), T-connector and instructions. Delivered in carton box.

Tough, double wall woven fabric, two way zipper carrying case.
Order reference : «IMCASE»

MityVac hand vacuum pump kit (see «special note 2 overleaf») : Die-cast metal hand vacuum pump with manometer to 1000 bars, storage jar, connection adapters. This kit has many other automotive uses. Documentation available.
Order reference «MV4000».
